

## CEILING FAN KIT

Installation Guide

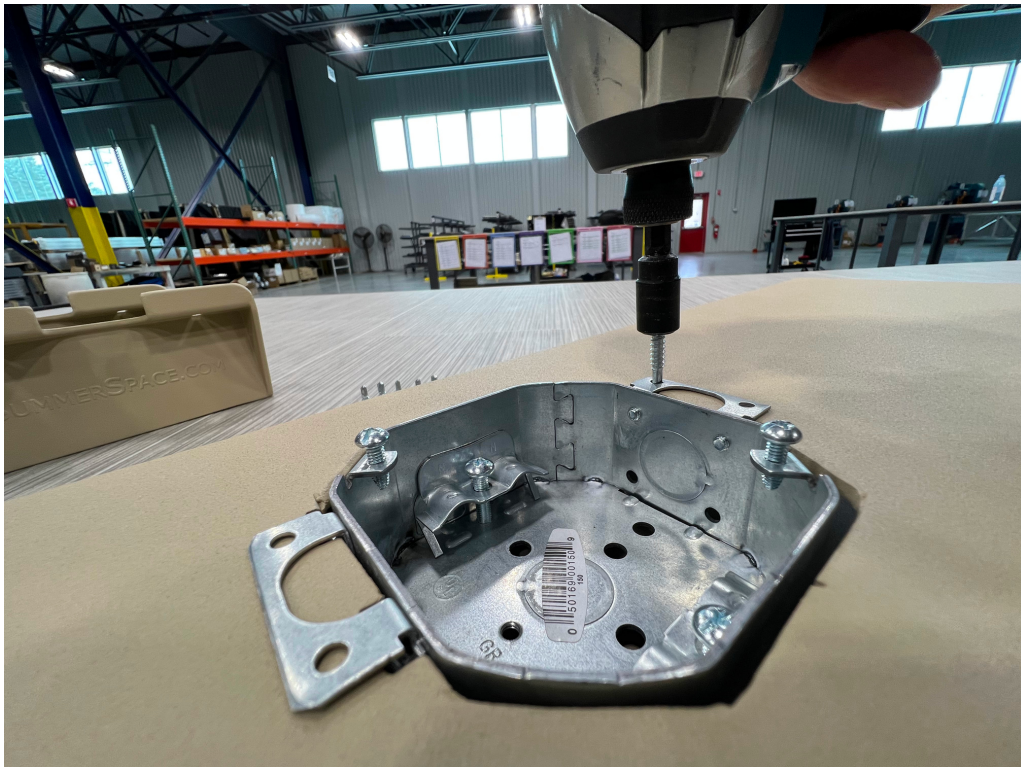

For assistance Call:  
**1 (207) 795-6536**

*Ceiling fan not included*

***Danger-** Electricity is dangerous and can cause personal injury or DEATH as well as other property loss or damage if not used or installed properly. SummerSpace ALWAYS recommends hiring a LICENSED ELECTRICIAN for all electrical work and is not responsible for injury or damage resulting from improper installation.*

## PROCESS:

- 1 Unbox the Ceiling Fan Kit and ensure all components are present
- 2 Install the included junction box into the opening of the receiver, securing with four **F9** self-drilling screws.

# ASSEMBLY INSTRUCTIONS

- 3 Insert the mounting brackets into the ends of the receiver. Orient the brackets so that the junction box will be facing down once installed and the brackets facing up.
- The brackets will fit tightly and won't slide easily into the receiver. Use a non-marring hammer to fully seat the brackets.

# ASSEMBLY INSTRUCTIONS

- 4 Align the fan kit under the center of the cupola ring of your SummerSpace Cabana or Leisure room so that the common rafter is cradled by the cutout of each bracket.
- 5 Secure the fan kit to your cupola ring using two **F9** self-drilling screws per side.

- 6 Have a licensed electrician run power to the junction box and mount your fixture.
