Manufacturers of world class outdoor parasols since 1990...

Since entering the market back in 1990, Woodline has been supplying a comprehensive range of top-quality, price-competitive OEM parasols for the local and international market. Well-known brands and contract market customers have benefited from our premium grade screen printing and latex digital printing, providing excellent branding opportunities for commercial applications.

Every aspect of our shade systems has been designed and produced to the highest standards possible for strength and longevity. We only use high grade non-corrosive materials for our frames and structures, such as lightweight aluminum, ultra weather-resistant eucalyptus and stainless steel for its remarkable strength.

As vertically integrated manufacturers of our own products in our own factories, we ensure each product meets our high standard of excellence, while providing opportunities to skillful artisans and a growing labor force dedicated to delivering the best possible products on time, every time. Our manufacturing hub is based in one of the fastest expanding urban areas in South Africa, and we have sales and distribution offices in Johannesburg, Cape Town and the USA.

Bolstered by the current expansion of our purpose-built production facility with significant growth potential, we are looking forward to a bright future.

#1

MANUFACTURER OF PARASOLS
We are the biggest manufacturer of parasols in the whole of Africa

30+

YEARS OF EXPERIENCE
We have been manufacturing our own parasols since 1990

100+

Sky

stainless steel

Available in these shapes & sizes:

** Dimensions may be rounded off to the nearest foot*

rectangular

feet / meters

9'6" x 13'1" / 2.9 m x 4.0 m

2.5 inch pole Ø

Code: SKY43RESS

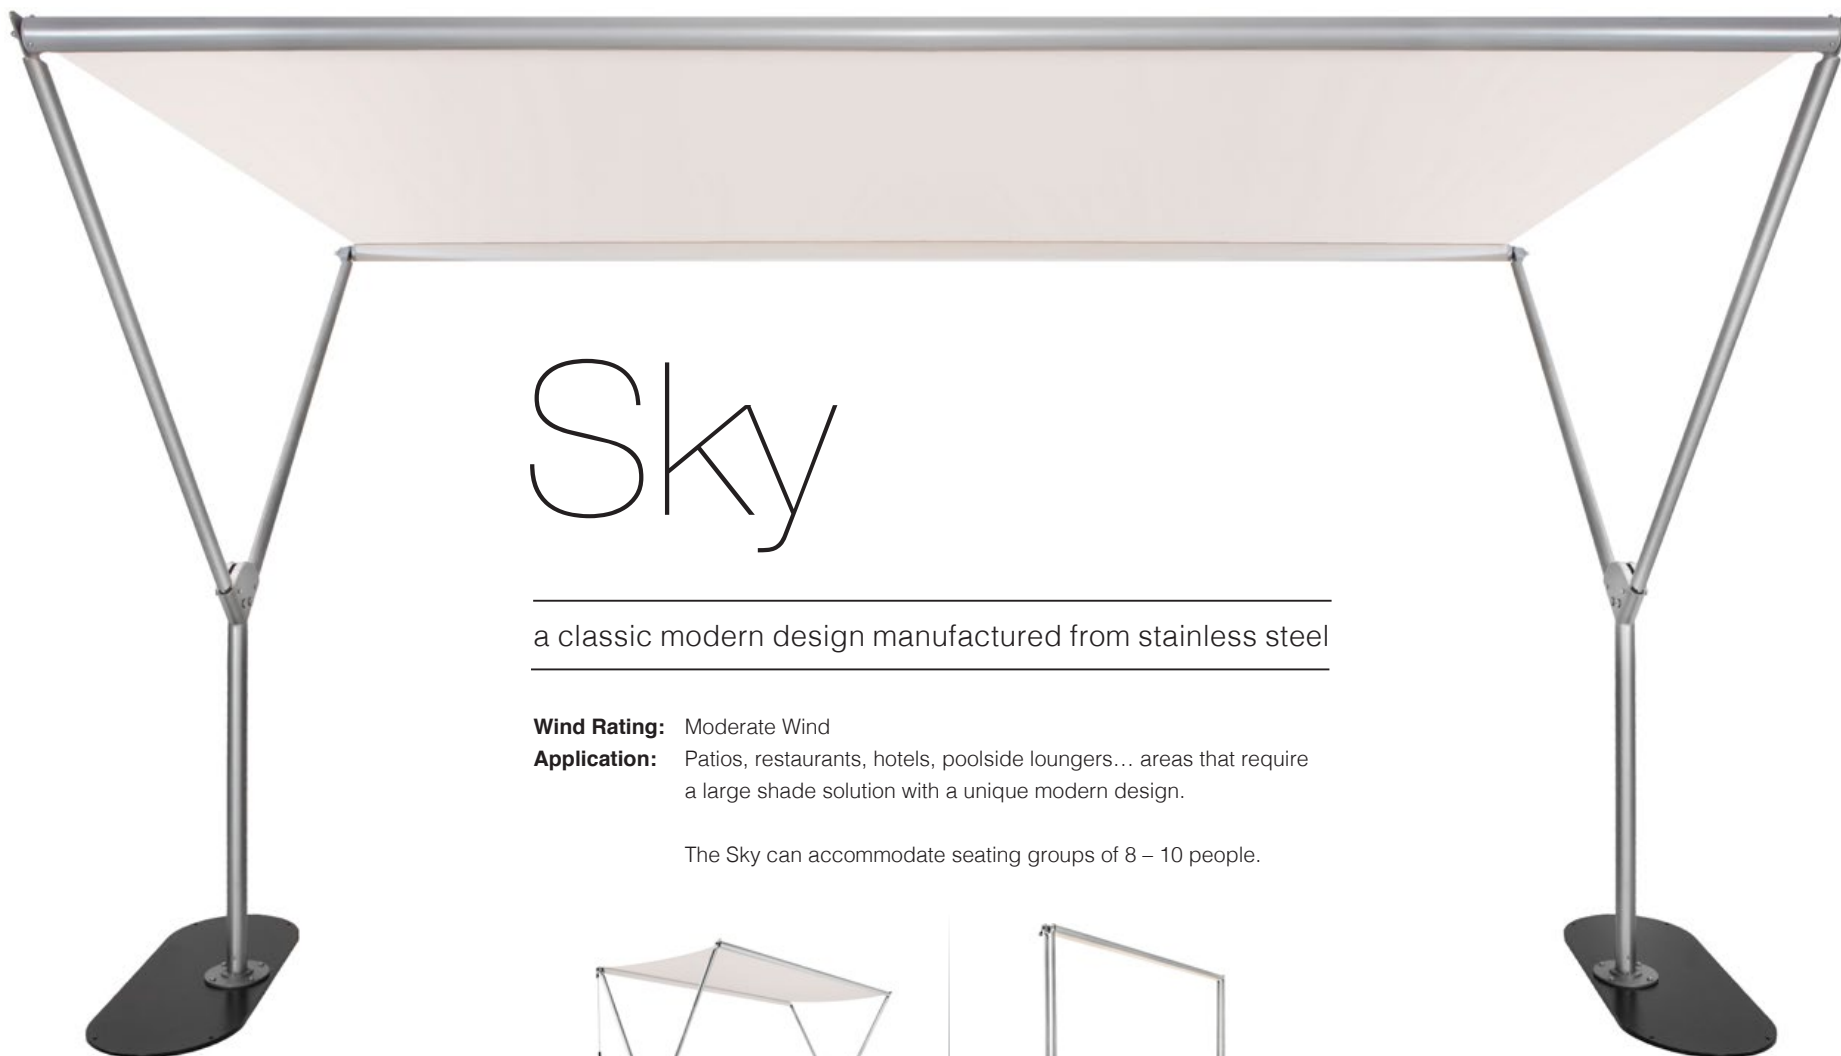

The Sky is a minimalistic free-floating shade solution that blends a mix of modern high-tech components with classic simplicity of design. The large horizontal canopy is ideal for substantial seating areas requiring unobstructed open space, while two or more Sky structures may be grouped side-by-side for even bigger applications. With its intelligent use of assisting gears, the Sky is a breeze to open and close and the sturdy stainless steel TIG welded structure is rock-steady, even in strong winds.

2 Sky shades joined side-by-side

The reduction gearbox and crank handle allow for easy opening and closing of the canopy. The locking pins secure the structure in place while the pivot box has been engineered to cope with all kinds of weather conditions.

Sky

a classic modern design manufactured from stainless steel

Wind Rating: Moderate Wind

Application: Patios, restaurants, hotels, poolside loungers... areas that require a large shade solution with a unique modern design.

The Sky can accommodate seating groups of 8 – 10 people.

At heart, the Papillon is the absolute socialite. Its dual post framework invites views and conversations to go on, unobstructed, in glorious shade and shelter, day and night. This unique range of shade cannot help but bring an air of grandeur to its surroundings. It stands alone as the largest of all Woodline shade solutions and yet this extraordinary shade can easily be extended further by articulating two or more Papillon structures together. Fabric walls can also be attached directly to the frame and awning to provide privacy and shelter from the wind.

Two or more Papillon shades can be joined together, either side-by-side with the use of an additional rain gutter to create one continuous awning, or placed end-to-end extending the shaded area in length.

Papillon

this is our largest shade structure – in a league of its own

Wind Rating: Moderate Wind

Application: Patios, restaurants, hotels, poolside loungers... areas that require a large shade solution with a touch of elegance and style.

The Papillon can accommodate seating for groups of 10 – 12 people.

Piccolo

aluminum

Available in these shapes & sizes:

** Dimensions may be rounded off to the nearest foot*

round / 8 ribs

feet / meters
10'6" / 3.2 m

Code: PI32RA

square / 8 ribs

feet / meters
9'10" / 3.0 m

Code: PI30SA

This ingenious side post parasol range is exceptionally versatile and remarkably hard-wearing. The Piccolo boasts a 360° rotation and also a unique side-to-side tilting feature that is intelligently designed to allow the canopy to track the sun and cast the perfect shade throughout the day. The canopy fabric is attached using a quick-release system, making it a breeze to remove for seasonal changes or care and maintenance. Versatility, durability and aesthetic design all align to make the Piccolo a genuine patron of shade.

360° rotation can be achieved on the Piccolo spigot which is kept in place with index notches. The spigot pole can be mounted to various base systems and may also be fixed directly into position with the Free Standing, Deck Mount or Underground Mount options.

Piccolo

versatile and durable side post parasol with aesthetic design features

Wind Rating: Light Wind

Application: Patios, restaurants, hotels, poolside loungers... or any area that requires a shade solution without obstruction from a center umbrella pole.

Code: PE34REAS

Strikingly bold, the Pendulum knows how to make the right impression. Featuring 360° head-turning rotation, effortless opening and closing with a smooth crank system and a magnificent mix of premium quality stainless steel linkages, anodized aluminum and a warm eucalyptus hub. The Pendulum is poised at the pinnacle of cantilever parasols.

The Pendulum's patented canopy clip mechanism has been designed to facilitate the quick and simple attachment and removal of the entire canopy assembly. The canopy is attached with a stay that hooks onto the frame structure and clips the canopy securely into place.

Pendulum

bold & strong side post parasol with 360° rotation & easy canopy removal

Grey with Grip Handle

black anodized finish

grey anodized finish

This side post umbrella makes for more free space. It offers shade without the usual center pole umbrella base taking up the space. This makes the Pavone especially suited for large areas, but also for private use. With an easy-to-operate crank mechanism, the umbrella and the shade is held by a high-quality aluminum structure that is rotatable, reclining and retractable. Available in black or grey finish options.

Grip Handle model
in anodized black

Grip Handle model
in anodized grey

Handwheel model
in anodized grey

The Pavone offers the flexibility only a side post shade can offer, with the convenience and flexibility of a foldaway function. The small folded footprint saves you space, while the 360° Rotate and Recline function makes the Pavone one of the most versatile shade solutions.

Pavone

the perfect combination of form, function and flexibility

Wind Rating: Light Wind

Application: Patios, restaurants, hotels, poolside loungers... areas that require a shade solution with the convenience of a cantilever system and the flexibility of a side post foldaway parasol.

Meticulously crafted from the finest grade kiln-dried eucalyptus (sourced only from sustainable forests), laminated for strength, along with premium quality weather-resistant fabrics and high grade stainless steel fittings. The Safari is Woodline's original classic wooden parasol design that proves the warmth of wood is still as popular as ever.

Features include a stainless steel pulley for smooth opening and an easy to remove smart canopy attachment system for seasonal changes or fabric care. The frame construction includes laminated hardwood upper and lower hubs for added strength.

The Bravura range is a brilliant contemporary take on Woodline's classic market parasol, combining the beauty and strength of mixed medium components with a unique modern look. The sleek anodized aluminum frame is perfectly complimented by the warm eucalyptus hubs, bringing together the best of two worlds in a feat of engineered elegance.

The double pulley with genuine leather rope clip features stainless steel components enabling long-lasting, smooth operation of the canopy, while the smart canopy attachment system allows for easy fabric removal for washing or seasonal updates.

Bravura

beauty and strength combine with mixed medium components

Wind Rating: Moderate Wind

Application: Patios, restaurants, hotels, poolside loungers... areas that require a center post umbrella shade solution with a contemporary look.

Engineered for strength, the Storm is fashioned from corrosion-resistant aluminum and stainless steel. Its robust structure is designed to withstand the onslaught of nature's fury. Through careful consideration Woodline has selected and developed the most resilient canopy fabrics to be able to handle whipping winds and scorching sun, while the built-in quattro pulley system of pure stainless steel assures smooth and effortless operation day after day.

The 60mm diameter centre pole with its 2mm wall forms the backbone of the Storm. The pole, joint plates, pulleys, hubs and fittings including the canopy attachment eyelets are all forged from the highest grade stainless steel as is used in the construction of super yachts.

Storm

tested in challenging conditions at South Africa's *Cape of Storms*

Featuring a concealed automatic raising system designed for effortless operation, with the canopy automatically locking in position once fully opened. No locking pin, ropes, pulleys or cranks are used, resulting in a sleek, modern design with maximum efficiency. To open, simply lift an arm until the Easilift system takes over, automatically raising the umbrella until it is totally open. To close simply pull down on the sliding hub until the Easilift system takes over, closing the umbrella automatically (*Patent Pending*).

Pole and structure constructed from natural anodized aluminum. Upper and lower hubs are a combination of aluminum, stainless steel and ABS, while the top dome, LOXX fasteners and connecting brackets are all made from stainless steel.

Easilift

With a unique automatic raising system for effortless operation

Wind Rating: Moderate Wind

Application: Patios, restaurants, hotels, poolside loungers... areas that require a moderate wind tolerance with an effortless opening and closing function.

The Mistral market parasol range, with its minimalist aesthetic look, perfectly illustrates the elegance of simplicity. Resilient, functional and maintenance free, it hits the mark with longevity and style. For OEM orders our premium grade screen and digital printing options offer excellent branding opportunities for commercial applications, making the Mistral as comfortable in the marketplace as well as in the home.

The Mistral features anodised aluminum ribs and pole with non-corrosive composite glass-reinforced upper and lower notches. The canopy opens effortlessly with a built in pulley system while the fittings are all made from stainless steel.

The Swift is a perfect parasol for small seating groups and compact areas like balconies and small gardens. Built with the finest materials available, this lightweight and portable design assures an easy setup and a trouble-free lifespan. The stainless steel pole with optional telescopic function makes it ideal for use over an outdoor table.

The only parasol on the market with a 1 inch stainless steel center pole. The height-adjustable pole option makes it a perfect solution for small spaces and getting your shade closer to your sun lounger, the handy pointed pole end also allows it to be used on the beach.

Swift

the compact & adjustable parasol that suits small spaces

Wind Rating: Moderate Wind

Application: Balconies, patios, beaches, gardens, poolside loungers or anywhere requiring a center post umbrella shade solution with a moderate wind tolerance.

Woodline concrete base systems are made to last. We use a combination of chemical additives, steel wire reinforcing and special fibers to add strength, longevity and a smooth superior finish.

Chemical Additives:

Our concrete bases are made with unique chemical additives for exceptional strength.

Steel Wire Reinforcing:

To eliminate fatigue all of our concrete bases feature steel wire reinforcing as standard.

paver base

The sturdy Paver Base consists of a hot-dip galvanized metal frame housing standard 16" square paver slabs. The Paver Base frame houses either a single layer of 4 pavers (single layer ≥ 177 lbs/80 kg) or a double layer stack of 8 pavers (double layer ≥ 305 lbs/138 kg) with the aid of the included Extension Kit, which is fitted to the frame when more weight is required.

Recommended paver size is 16" wide x 1,7" tall. To reduce shipping costs pavers can be purchased separately near installation location.

concrete base

Woodline's reinforced hexagonal Concrete Base fits any of our center pole parasols with various combinations of weights and tube sizes available for desired applications. Manufactured in our own plant using a unique combination of 35 MPa concrete with special fibers plus chemical additives & steel wire reinforcing. Comes with indents on two sides for easy handling and molded stainless steel inserts to take your choice of tube or spigot.

Indents on two sides for easy lifting or placing of base

metal

base mounting options

Woodline metal stands are available in hot-dip galvanized or powder coated steel.

Hot-Dip Galvanizing:

To withstand even the harshest outdoor conditions, we use a hot-dip galvanizing process for longevity.

Powder Coating:

Our metal plate bases are powder coated, giving a high-end finish that prevents corrosion.

Nylon Rollers:

To enable easy positioning, our Square Metal Plate Base has added nylon rollers on one edge.

square
metal base

Nylon
Rollers

The Square Metal Plate Base comes in two sizes for various wind exposures. Selected sizes come with rollers to aid mobility.

double stack
metal base

Designed for the side post ranges, but mounts any of our bolt-on pole stands to fit all our shades. It features height-adjustable nylon feet with stainless steel thread.

oval
metal base

The Oval Metal Plate Base is designed for our Sky dual post parasol, making it rock-steady in strong winds. Can also be bolted to the floor for extra stability.

round metal
base

Comes in one size and can be fitted with various tubes for the center pole range. Powder coated as standard and can also be bolted to the floor for extra stability.

triple stack
metal base

Designed for the side post ranges, but mounts any of our bolt-on pole stands to fit all our shades. It features height-adjustable nylon feet with stainless steel thread.

rectangular
metal base

Designed to fit the Papillon shade - two Papillons can be mounted end-to-end using the dual hole system. It can also be bolted to the floor for extra stability.

alternative

base mounting options

In addition to the various metal and concrete bases, Woodline also manufactures alternative mounting solutions to meet every requirement.

table clamp

48mm (1.9") or 57mm (2.2") polished stainless steel Table Clamp for bolting onto a wooden or concrete (park) table. Can be mounted from above or from below. Features shoe horn and hand wheel for securing the pole.

deck mount

The Deck Mount is a stainless steel bracket that is bolted directly between the framework of supporting beams underneath a wooden deck. Your choice of Woodline pole or spigot is then bolted from above through the deck directly onto the bracket.

in-ground bayonet

Consists of two parts - the in-ground tube (which is concreted into the ground) & the bayonet tube (which slides into the tube and fastens when twisted). Both parts are made of stainless steel.

concrete mount

Consists of a round metal base plate bolted directly to the floor with 4 concrete screw bolts. Concrete flooring needs to be at least 4 inches deep at 35MPa. Compatible with all Woodline shade systems via a bolt-on pole stand or spigot pole.

underground mount

The Underground Mount is designed to be concreted into the ground and is compatible with any of our shade systems by means of a bolt on pole stand for center and dual pole shades or spigot poles for our side post shades.

CONCERTO

UV / Fade Resistant

Pigments integrated into the material give exceptional fade-resistance while 80% of the sun's UVA and UVB rays are blocked.

Mold / Mildew Resistant

Symphony fabrics contain special coatings to be both mold and mildew resistant, meaning less time spent on cleaning.

Easy to Clean

For most dirt and stains, marks can be easily removed with the use of a damp cloth and cleaning solution.

Suitable for Pool Sides

Symphony fabric resists the corrosive effects of chlorine and is perfectly suitable for use at pool sides etc.

Water Resistant

The fabric is engineered to ensure its water resistant capabilities with all forms of liquid being dispersed, creating a sheltered space.

Stain Resistant

The fabric is treated to be able to resist stains - simply brush clean and wash any soiled areas with a mild bleach solution.

Strong and Durable

Symphony fabric will maintain its strength and durability throughout its entire lifespan, outlasting extreme outdoor conditions.

UV / Fade Resistant

Saturated throughout with UV stable pigments, solution dyed acrylic has performance characteristics which are integrated into the fabric.

Mold / Mildew Resistant

Our canopy fabrics resist the growth of mold and mildew. To keep clean, simply brush off dirt before it gets embedded in the product.

Breathable Comfort

Our shade fabrics are breathable and actually allow air to pass through them, creating a comfortable space below.

Suitable for Pool Sides

Solution dyed acrylic fabric resists the corrosive effects of chlorine and is perfectly suitable for use at pool sides.

Less Waste

Because our canopy fabrics last longer they ultimately create less waste than fabrics that mildew, fade or lose strength quickly.

Resists Stains

These fabrics are treated to be able to resist stains - simply brush clean and wash soiled areas with a mild bleach solution.

Recyclable

Sunbrella provides a unique way for you to recycle your Sunbrella fabrics, read more at www.recyclemysunbrella.com

* Colors may differ from printed examples. To accurately check color request a sample from one of our agents.

digital printing

latex ink digitally printed branding *(only available on white polyester)*

Benefits of digitally printed branding:

- No limits to your branding designs
- Fast turnaround time
- Low set up costs & easy re-orders

Best suited for these applications:

- All-over patterns & photographic designs
- Designs using gradients or color fades
- Double-sided prints (with grey blackout)
- Annual or bi-annual brand updates

Latex inks provide outdoor durability & versatility together with high quality odorless canopy prints and a reduced environmental impact.

The water-based formulation provides healthier print production than solvent inks without trading off performance. It contains no toxins, making our parasols safe for use in dining areas, hospitals, schools, clinics etc. If your corporate mission statement includes a dedication to protecting the environment, you should make latex ink branded parasols a part of your future marketing campaigns.

Water-based latex inks are nickel-free and odorless, providing outdoor durability and a healthy environmental footprint. Our inks meet a range of stringent human health criteria represented by UL ECOLOGO and GREENGUARD GOLD certifications.

Design by Chiara Rimpa Project & Volta Studio

screen printing

premium screen printed branding

Benefits of screen printed branding:

- Corporate spot colors can be matched
- Good printing thickness for clear logos
- Good light resistance for outdoor use

Best suited for these applications:

- Bold, flat color branding designs
- Pantone, metallic & luminous colors
- Solution dyed acrylic canopies
- Long lifespan brand campaigns

For over thirty years Woodline Shade Solutions has been supplying a comprehensive range of top-quality, price-competitive OEM parasols for the local and international market. Well-known brands and contract market customers alike have benefited from our premium grade screen printing, providing excellent branding opportunities for commercial applications, making our parasols perfectly suited for use in the marketplace as well as in the home.

The screen printed method of branding is effective and long-lasting. A separate screen and positive film is required for each color. We can print up to 8 colors, including Pantones, metallics and luminous colors. CMYK process, halftone and index print techniques are also available.

care & maintenance

The extreme nature of the outdoors dictates that proper care & maintenance will extend the lifespan of any item

Frames

Constructed from the finest quality aluminum, marine grade stainless steel and durable and sustainable eucalyptus timber. Our frames have been tested in some of the world's most inhospitable environments and have only ever benefited from the appropriate application of caution and common sense in excessive wind conditions.

We advocate the use of our cover bags to prolong the life of the canopy frames and their covering fabrics. We recommend the closure and safe storage of any collapsible and removable components when the parasol is not in use or when winds are expected to exceed 40 km/h (25 mph).

Wooden Components

We only use sustainable eucalyptus timber hand-picked for its strength, weather-resistance, and replenishment efficiency from the world's finest renewable plantations and timber mills. Our wooden components are treated with marine yacht varnish to fortify them for the rigours of outdoor living. We recommend the periodic care of wooden components with a light sanding and reapplication of the varnish coating once a year to maintain the natural beauty of the wood.

Fittings

All fittings, nuts, bolts, pulleys and cleat components are made with high grade stainless steel and weatherproof nylon. Maintaining these fittings and components is imperative to the longevity and the proper operation of the shade system. A simple occasional fresh water rinsing will help keep them working well and looking good.

Bases

It is essential to pick the right base for your parasol, consult the options for each product and talk to our sales team to ensure that the parasol you choose has the appropriate base to keep it anchored properly.

Fabrics

Our canopies and fabric covers are made from the most durable, colorfast, and dirt-repellent fabrics in the world. That said, proper care such as storage when not in use and cleaning from time to time will undoubtedly extend their lifespan.

Warranty

We produce the best quality products possible and are proud to be able to offer the following warranty on Woodline products, valid from the date of purchase:

Umbrella Structure:	24 months / 2 years
Symphony fabric:	60 months / 5 years
Sunbrella fabric:	60 months / 5 years

* The warranty in respect of the Sunbrella fabrics covers the fading of the color as a result of normal weather conditions and does not cover any other defects or damages. The warranty is not applicable to normal wear and tear, damage or loss caused by Acts of God or any other sources beyond Woodline's control, damage or loss caused by another device or product that is connected to the product, damage resulting from accidents, misuse, tampering or failure of the customer to follow the normal operating procedures as outlined in the user manual. The warranty is void if the damages are as a result of abuse, negligence, vandalism, improper installation, accidents, and exposure to abnormal weather conditions, poor transit, major force, failure to maintain or other causes which cannot be defined as a defect by Woodline. The warranty is void if repairs, alterations or modifications are done by a person not authorized by Woodline or if non-standard parts are used without prior written approval by Woodline. Woodline is not responsible for parts or labor coverage for component failure and or other damages resulting from improper usage, installation or failure to clean and/or maintain the Product as set forth by informational material. Woodline is not responsible for the repair or replacement of failed or damaged components resulting from unauthorized modifications to Products or the use of non-standard parts without prior written approval from Woodline. Woodline may provide the Purchaser with spare parts in order to resolve the defect during the warranty period. All warranties issued by Woodline are limited to only the original Purchaser of the Product. The warranty does not transfer with change of ownership.

oem options

We do custom OEM production for many international customers

Marine grade stainless steel

Use stainless steel in marine grade #316 instead of #304.

Polished or glass bead blasted

Choose between a mirror-like polished finish or a matt sheen on stainless steel.

Colored wooden components

Choose from an array of color stains.

Powder coating of aluminum

Extend the lifespan and add your choice of color plus a gloss finish.

Nylon components moulded in colors

Choose the nylon component colors.

Canopy sewn with different colors

Mix it up with different fabric, thread and binding colors making up your canopy.

Fabric supplied by client

Use your own fabric (subject to fulfillment of technical requirements).

Canopy with added tassels

Add your choice of hanging tassels.

Canopy with added valance

A stylistic facade draping from the canopy edges to make the parasol feel bigger.

Canopy attachment options

Choose from fabric pockets, leather pockets, stainless steel eyelets or the stainless steel LOXX attachment system.

Upgrading base steel components

Using stainless steel #304 or marine grade #316 in place of regular mild steel.

Branding on parasols and cover bags

Hot-dip galvanizing of metal bases

Adding color tints to concrete bases

Genuine leather rope clips

Wall mounted brackets

Optional storage trolleys

Custom parasol sizes
