Available in these shapes & sizes:

*\* Dimensions may be rounded off to the nearest foot*

round / 8 ribs

feet / meters  
11.5 / 3.5

2 1/2 inch pole Ø

Code: ST35RSS

square / 8 ribs

feet / meters  
10.0 / 3.0

2 1/2 inch pole Ø

Code: ST30SSS

Engineered for strength, the Storm is fashioned from corrosion-resistant aluminum and stainless steel. Its robust structure is designed to withstand the onslaught of nature's fury. Through careful consideration Woodline has selected and developed the most resilient canopy fabrics to be able to handle whipping winds and scorching sun, while the built-in quattro pulley system of pure stainless steel assures smooth and effortless operation day after day.

The 60mm diameter centre pole with its 2mm wall forms the backbone of the Storm. The pole, joint plates, pulleys, hubs and fittings including the canopy attachment eyelets are all forged from the highest grade stainless steel as is used in the construction of super yachts.

# Storm

---

tested in challenging conditions at South Africa's *Cape of Storms*

---

**Wind Rating:** Strong Wind

**Application:** Patios, restaurants, hotels, poolside loungers... areas that require a high wind tolerance.
